## NEW SEARCH ENGINE:

Yaleil Ya3in (YY) has been working on a new search engine that is made to revolutionize the way people in the industry interact with each other.

It will add a layer of transparency between all types of artists ranging from Singers to Musical Producers to Brands that want to offer something to the community.

Yaleil Ya3ein's CEO hopes to accomplish this within the next 3 months as it has been difficult for the company to find a group of coders to execute the vision that the company wants for the industry.

## TIPS BY TONI BAYEH:

During the past month YY has executed an interesting offering to the community, where it has been working together with **Toni Bayeh** to share with community members frequent tips on what they can do to better themselves when it comes to their singing talents.

**Toni Bayeh** is a full on trainer when it comes to musical abilities (specifically singing). He is a singing coach that has worked with hundreds of individuals throughout his career. He has a very cumulative resume which covers his experience in star academy and him working with a lot of notable artists within the middle eastern region.

His skills are very valuable and the YY team hopes that his tips will add value to the viewers and community members.
